

Guidelines for Using SPELL-Links™ eStickers with SPELL-Links Pattern Inventory & Analysis Tool (PIAT) Inventories

- If you are administering the PIAT inventory as a pre-test and to identify areas of instructional need, select the grade-level PIAT inventory that matches the student's current grade level. If the student is an *extremely* poor speller, you may wish to administer the grade-level PIAT inventory that is one grade below the student's current grade level.
- If you are using the PIAT inventory to track progress over time, administer the same PIAT inventory that was completed for the pre-test.

Administer ALL items of the selected inventory. A student's misspellings provide a window into what language knowledge, skills, and strategies the student doesn't have and isn't applying. The more spellings and *misspellings* you collect from a student, the more useful information you will have to inform and direct your individualized instruction.
